**Symposium on Natural
Resource Management in Agriculture (NaRMA-II)**
(10-11 December, 2010)

Notification & Call for Papers

The Phosphate Rich Organic Manure (PROM) Society has been formed by a group of more than 180 scientists representing Agriculture, Botany, Microbiology, Engineering and other related disciplines. The society was inspired by the idea of developing low cost organic manure, enriched with a natural mineral, the rock phosphate. . The Rajasthan State Mines and Minerals Ltd. (RSMML), Udaipur is the mother institute which patronized the pioneering efforts of developing PROM technology as alternative to cost intensive phosphatic fertilizers like DAP and SSP. The PROM Society gradually became poised to address issues of natural resource management in agriculture. The paradigm evolution in the theme was evident in the publications of PROM & NaRMA reviews.

The NaRMA-I was organized at ARS, Durgapura, Jaipur in 2008 and The NaRMA-II shall be organized at Udaipur (India) under the aegis of PROM Society and Maharana Pratap University of Agriculture and Technology(MPUAT), Udaipur

Issues, outcomes and imperatives of research in sustainable crop production, low cost organic fertilizers, integrated crop and live stock management and finally the innovation at scientists and grass root level would be discussed during NaRMA-II to prepare an action plan to achieve the objectives of low cost, eco-friendly and sustainable agriculture to ensure food security. With these perspectives the scientists and all concerned are invited to send their abstract of paper to following contact:

Organizing Secretary
Rajasthan State Mines and Minerals Ltd.(RSMML),Udaipur(Raj.)
email: promsociety@gmail.com

The first circular shall follow soon with the details of organization of Symposium (NaRMA-II) at Udaipur.

Looking forward to your active participation and support,

(A.K.Purohit)
